2) INTERACTION/STATE DIAGRAM OF THE SYSTEM

Explanation of the Sequence Diagram

Participants

Customer:

Initiates the booking process and provides payment details.

Booking System:

Handles the booking process, interacts with the Slot Manager and Payment System.

Payment System:

Processes the payment and confirms the transaction.

Slot Manager:

Manages slot availability and updates slot status after a booking.

Operator:

Receives notifications about new bookings and acknowledges them.

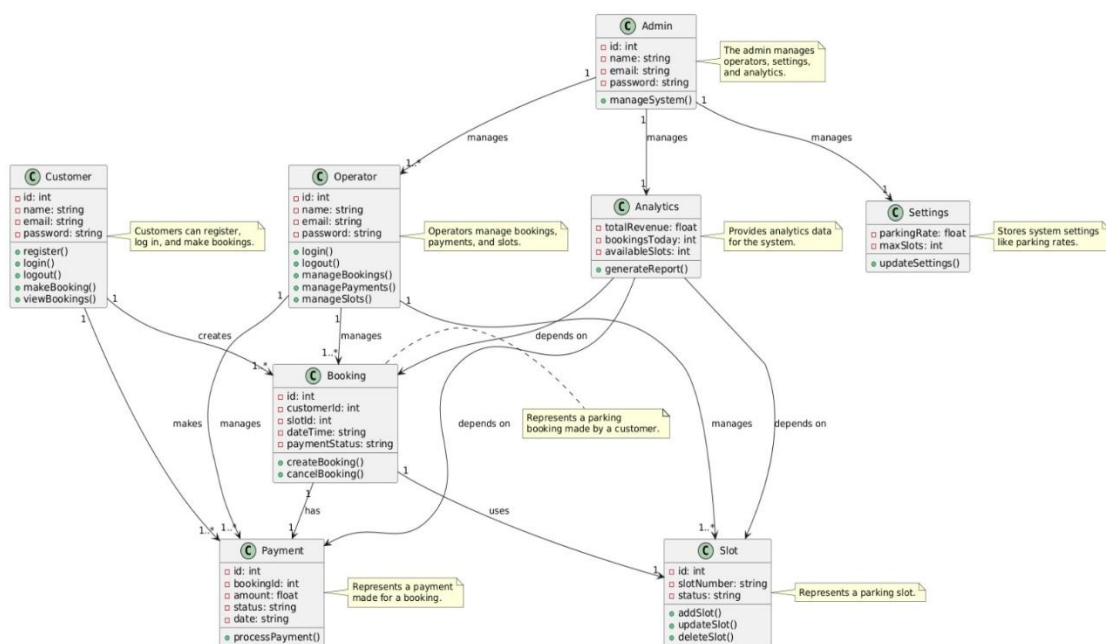

Sequence of Interactions

- The Customer requests to book a slot.

- The Booking System checks slot availability with the Slot Manager.
- The Slot Manager confirms that the slot is available.
- The Booking System shows available slots to the Customer.
- The Customer selects a slot and confirms the booking.
- The Booking System initiates payment with the Payment System.
- The Payment System requests payment details from the Customer.
- The Customer provides payment details.
- The Payment System processes the payment.
- The Payment System confirms the payment to the Booking System.

- The Booking System updates the slot status with the Slot Manager.
- The Slot Manager confirms the slot status update.
- The Booking System confirms the booking to the Customer.
- The Booking System notifies the Operator about the new booking.
- The Operator acknowledges the notification.

3) CLASS DIAGRAM

Explanation of the Full Class Diagram

Roles

Admin:

- Manages Operators, Settings, and Analytics.
- Attributes: id, name, email, password.
- Methods: manageSystem().

Customer:

- Can register, log in, and make bookings.
- Attributes: id, name, email, password.
- Methods: register(), login(), logout(), makeBooking(), viewBookings().

Operator:

- Manages Bookings, Payments, and Slots.
- Attributes: id, name, email, password.
- Methods: login(), logout(), manageBookings(), managePayments(), manageSlots().

Entities

Booking:

- Represents a parking booking made by a customer.
- Attributes: id, customerId, slotId, dateTime, paymentStatus.
- Methods: createBooking(), cancelBooking().

Payment:

- Represents a payment made for a booking.

- Attributes: id, bookingId, amount, status, date.
- Methods: processPayment().

Slot:

- Represents a parking slot.
- Attributes: id, slotNumber, status.
- Methods: addSlot(), updateSlot(), deleteSlot().

Analytics:

- Provides analytics data for the system.
- Attributes: totalRevenue, bookingsToday, availableSlots.
- Methods: generateReport().

Settings:

- Stores system settings like parking rates and maximum slots.
- Attributes: parkingRate, maxSlots.
- Methods: updateSettings().
